Joint Action Quality & Safety

Until the end of 2011, the EFN has been a key player in helping the coordinator (HAS-France) and the work package leaders in designing the process and last versions of content of the Joint Action prior the European Commission evaluation. In general term, this Joint Action aims to strengthen cooperation between Member States, international organisations and EU stakeholders on issues related to quality of healthcare. One of the main objectives is the creation of a permanent network for Patient Safety in Europe that will reflect on principles of good quality healthcare, patient safety and patient involvement.

By sharing experiences and solutions in patient safety and related aspects of quality of care, the EU Member States, the regions, and the healthcare facilities can benefit from the knowledge of the others. A selection of good practices will be made, with a preference for those that are relevant for most Member States and their respective healthcare systems.

This work should also contribute to the establishment of **national patient safety and quality networks** or platforms involving all relevant national stakeholders. In the long run, this voluntary exchange of experiences may lead to a peer review system for quality management systems in healthcare. This approach will build on the work of EUNetPaS in which the EFN was actively involved.
