

The European Network for **Patient Safety & Quality** JA PaSQ

International Forum on Quality & Safety
in Healthcare
Paris, 10 April 2014

J.Bacou, HAS
PaSQ coordinator

The European Network for **P**atient **S**afety & **Q**uality JA **P**a**S**Q

- I declare having no conflict of interest linked to the work presented.

The European Network for **P**atient **S**afety & **Q**uality JA **P**a**S**Q

- Agenda:
 - Global presentation of PaSQ 10' - J. Bacou
 - Implementation in HCOs 10' - L. Mehrmann
 - Exchange mechanism 15' - B.Wendelboe/Y.Agra
 - PaSQ database (interactive) 15' - J. Mesaric
 - Discussion 10'

PaSQ: an EU network...

An EU-level platform for collaboration and networking between:

- 28 Member States + Norway
- International organisations: WHO, OECD, ISQua, EPSO
- European stakeholders in the field of healthcare (healthcare professionals, patients, institutions, scientists)

PaSQ European Union Network
for Patient Safety and
Quality of Care

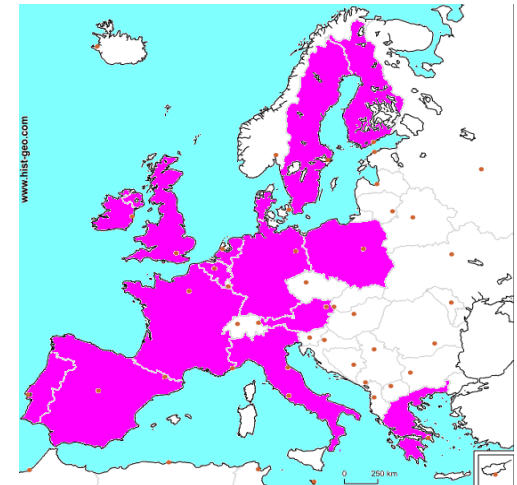

Funded by
the Health Programme
of the European Union

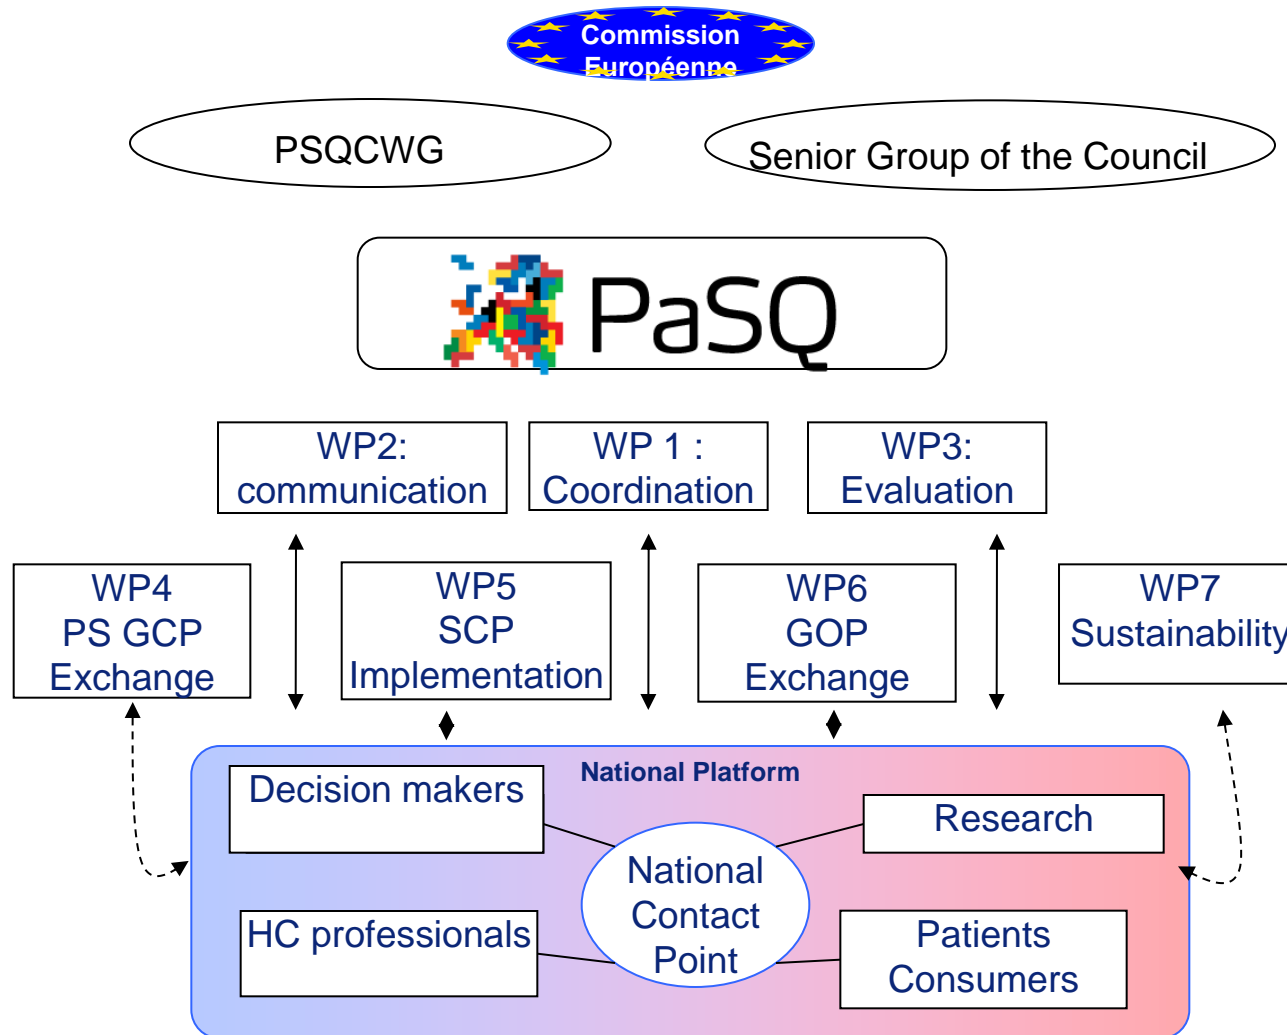

...of National Networks

- National Institutions on Patient Safety (PS):
 - Health Care Quality agencies
 - Dedicated PS agencies or Department
- Decision makers and financiers
- Healthcare professionals
- Patient representatives
- Research teams on PS

National platforms

PaSQ organisation

Work Plan

Preparatory Work: April – Oct. 2012

.literature review

.glossary

Data collection: Nov. 2012 – Feb 2013

➤ Implementation: Jul. 2013 – Sept. 2014

Analysis: Oct. 2014 – Jan. 2015

Recommendations: Feb – March 2015

PaSQ tools

- Mutual learning web platform: www.PaSQ.eu
- Exchange mechanisms in MS (20/25): national and cross national exchange of knowledge and experiences
 - *European conferences, on-line courses, workshops, site visits*
 - *National network building,*
- PS good practices implementation (18 MS)

PaSQ First results

1 - About 35 events (international meetings, workshops, webinars, study tours) will be organised in the EU MS to:

- exchange information regarding selected clinical and organisational good practices

- build relationship between experts and practitioners and decision makersto promote the implementation of good practices in different settings

2 - About 200 EU HCOs have implemented and and will assess transferability of selected clinical good practices.

3 – About 400 good practices available in the PaSQ database with relevant contact details.

A Sustainable network for Patient Safety and Quality of Care

- 1 - PaSQ network is currently demonstrating that knowledge exchange and mutual learning is a credible alternative to European standardization. Furthermore, this approach contributes to the provision of safe and high quality care in accordance with point 2 & 7 of Art 168 of the treaty
- 2 - The permanent network will further develop this approach, by increasing knowledge transfer via existing PaSQ web tools (database and exchange mechanism) and proposing further implementation tools to support MS in.
 - patient involvement/empowerment
 - reporting and learning / rapid alert systems
 - quality improvement systems
 - implementation of good clinical practices

PaSQ proposal for a sustainable collaboration

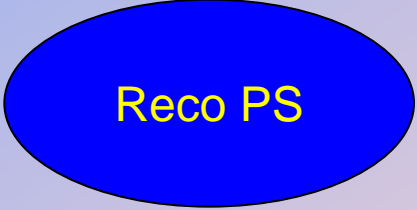

6. Key functions: optional

- A sustainable system for knowledge transfer (KT)
- Patient involvement and empowerment: A proposed set of good practices can be shared through an interactive platform for sharing and learning, including initiatives on health literacy.
- Implementation of selected good practices in clinical settings
- European peer review system for Care Quality Improvement Organisations (CQIO).
- Rapid exchange mechanism for Patient safety solutions and issues (EUNetPaS SEaL)

PaSQ proposal for a sustainable collaboration

Levels of collaboration: involvement in key functions for the PaSQ
Permanent network is ranked according to four levels of collaboration.

- Level 1: sharing and exchange of information (on a voluntary basis).
Participating to knowledge transfer
- Level 2: Participating to the exchange mechanism
- Level 3: Voluntary participating to implementation exercise(s)
- Level 4: Participating to implementation tools development.

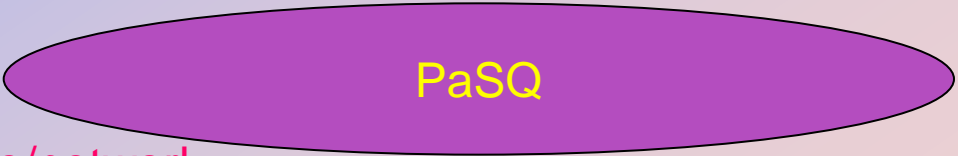

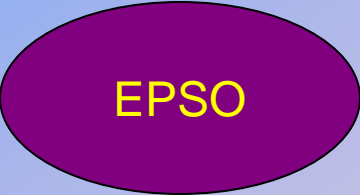

Standards
