- Web PS & QC good practices exchange platform

Patient Safety and Quality of Care Good Practices

Patient safety practices have been reported by professionals at local level while Quality of care good practices have been reported by EU Member States, Regions and PaSQ EU Stakeholders. All of these practices were reviewed twice, before their display, to ensure they included the appropriate information to facilitate their understanding and transferability.

The Good Practices contained herein should be considered within the context in which they have been implemented. If you consider to adopt some of these practices, please consider your own context prior to implementing.

PaSQ Questionnaire

Safe Clinical Practices for Implementation

The Safe Clinical Practices (SCPs) are being implemented in Healthcare Organisations in Europe. The findings of a literature review and a survey of PaSQ National Contact Points resulted in a set of 4 SCPs for implementation. For each SCP a tool box has been developed.

PaSQ Exchange Mechanisms

PaSQ Exchange Mechanisms are instruments (workshops, study tours, on-line courses, the PaSQ data base etc.) aiming for sharing, learning and exchanging information, knowledge, skills, and experiences across EU.

The events are based upon Good Practices to enhance quality of care and patient safety. You can read more about planned events and register here.

BCPs for Implementation: Webinars

PROJECT

The European Union Network for Patient Safety and Quality of Care, PaSQ Joint Action is co-funded and supported by the European Commission within the Public Health Programme.

Its focus is to improve Patient Safety and Quality of Care through sharing of information, experience, and the implementation of good practices. These platforms are organised around PaSQ National Contact Points (NCPs), who are also the contact persons for PaSQ matters in their respective countries.

WORKING PATTERN

It is running for 36 months (April 1st 2012 – March 31st 2015), and is performed through seven (7) Work Packages.

OBJECTIVE

The main objective of PaSQ is to support the implementation of the Council Recommendation on Patient Safety. PaSQ unites representatives of the European medical community, and the institutional partners involved in Patient Safety and Quality of Care in the Member States of the European Union.

PaSQ QUESTIONNAIRE

The second round of data collection began on February 17th 2014, and ended on March 30th 2014. It is possible to submit good practices until the end of the PaSQ JA. You can access the Questionnaire through Sign Up (if you are not a registered user) or Log In (if you are already a registered user).
